TRUTH SEEKER

Truth Seeker, “the journal of independent thought,” is also the world’s oldest continuously published small press publication in America.

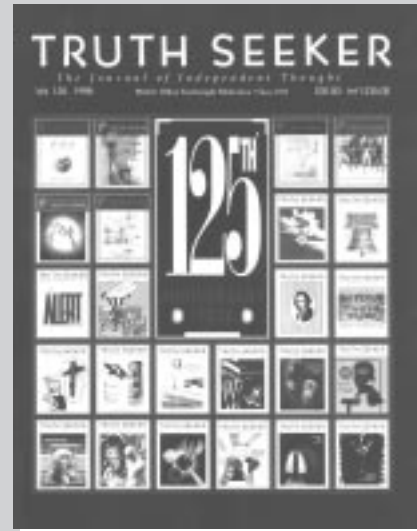

The Truth Seeker began as a tabloid newspaper on September 1873 in Paris, Illinois, and moved to New York City in December 1873. The founders, D. M. Bennett and his wife Mary, stated their purpose on the masthead with these words:

“Devoted to: science, morals, free thought, free discussion, liberalism, sexual equality, labor reform, progression, free education and whatever tends to elevate and emancipate the human race.”

Truth Seeker focuses on matters concerning political and religious issues. If you are new to Freethought and seek an overview, we suggest the writings of Voltaire, Thomas Paine, Thomas Jefferson, Robert G. Ingersoll, Bernard Russell, Ayn Rand, and Mark Twain. They will open the doors to many more.

Truth Seeker is the world’s oldest Freethought publication. Freethought is characterized by common sense, reasoning and a rational approach to life. We actively promote the fact that people are capable of thinking for themselves and do not need an outside authority to arrive at decisions concerning one’s life.

DAVID ICKE

David was born in Leicester, England. He started as a professional soccer player. In 1973 at the age of 21 rheumatoid arthritis ended his career in soccer. He then ventured into journalism and regional television until 1980, when he became a network television news and sportscaster.

He became the National Spokesman for the British Green Party from 1988 until 1991. While working with the Green Party, Icke started to research into issues such as Third World debt, its true causes, and how it could be effectively resolved. Icke soon uncovered a disturbing pattern of events and exploitation that was to change the direction of his life forever.

As his research progressed, Icke left the Green Party and committed himself totally to his research. From 1991 until the present day Icke has become a man with a mission. Icke seeks to research and expose the truth about the nature of the human race and how we have been conditioned, the manipulation of the world today and how we can set ourselves free.

The Biggest Secret — Icke's New Book — Now Available!!!

The Biggest Secret, his most powerful and explosive book to date, includes the astonishing background to the **murder of Diana, Princess of Wales**. Every man, woman, and child on the planet is affected by the stunning information that Icke exposes. He reveals in documented, footnoted detail:

- How the same **interconnecting bloodlines** have controlled the planet for thousands of years;
- How they created all the major religions;
- How they suppressed the spiritual and esoteric

knowledge that will set humanity free from its mental and emotional prisons;

- How **Diana, Princess of Wales, was murdered in Paris in 1997 — and why;**
- How big religion, big politics, big banking, and big business were designed from the start to control and suppress human potential;
- How true spiritual and scientific knowledge have been hoarded since ancient times by a few controllers;
- How that true knowledge has been systematically withdrawn from public circulation;
- How to break free of the daily programming.

BRIAN O'LEARY

Brian O'Leary received his Ph.D. in astronomy from the University of California at Berkeley in 1967, and has since published over 100 peer-reviewed articles in the scientific literature in planetary science and astronautics. He has served on the faculties of Cornell University, California Institute of Technology, University of California at Berkeley, and Princeton University. He was a NASA scientist-astronaut during the *Apollo* program and was deputy team leader of the *Mariner 10* Venus-Mercury television science team. He is the author of *Mars 1999* and other space books, and lectures worldwide on future opportunities in space exploration.

Exploring Inner and Outer Space

Brian O'Leary

“It took courage to write this book. For a scientist to break out of the fantasy that afflicts the scientific community as a whole and face the unknown is extraordinary. *Exploring Inner and Outer Space* is a compelling journey into an amazing truth: we do not understand our world or our place in it. Genuine scientists are far too rare in our society. It takes one to admit the existence of the unknown, and to face it. Brian O'Leary has done this with courage, wit, and energy.”

—Whitley Strieber, author of *Communion*

“Brian O'Leary courageously challenges us to go beyond our materialistic and reductionistic world view to ask ourselves important questions of science and ourselves. These questions may lead us to a more organic view of the living system of which we are a part. His humility in this endeavor models the vulnerability and openness required by each of us in a universe made newly mysterious by the latest scientific discoveries.” —Dr. Obadiah Hams, Dean of Faculty and Students, California Institute of Integral Studies, San Francisco, and author of *The New Consciousness*

At the present time, books of this kind may not be for everyone; but I believe that before too long they will be much more widely accepted. I myself wouldn't have picked up this book during the 1960s or 1970s when I was a university-based planetary scientist. At that time I was a typical “left-brained” academic — rationalistic, reductionistic, deterministic, materialistic — and I felt I had the universe and its laws mastered.

The Second Coming of Science: An Intimate Report on the New Science

Brian O'Leary, Ph.D.

The Second Coming of Science is sponsored by the Society for the Study of Native Arts and Sciences, a nonprofit educational corporation whose goals are to develop an ecological and crosscultural perspective linking various scientific, social and artistic fields; to nurture a holistic view of arts, sciences, humanities and healing; and to publish and distribute literature on the relationship of body, mind and nature. Includes bibliographical references and index.

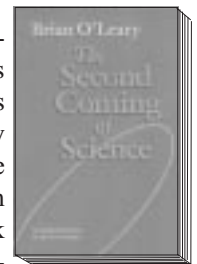

Brian O'Leary is a prototype practitioner of the science that is longing to be born. I recommend *The Second Coming of Science* to all true scientists, that is, all seekers of the truth.

— **Gary Zukav**, author of *The Seat of the Soul*

This superb and lucid book should be required reading for all scientists. Brian's background in traditional physics provides him a base from which we can eventually understand paranormal phenomena and be able to establish new laws of science which are compatible with the old laws. The book is written in such an interesting and delightful way that both the scientist and the lay person will have a hard time putting it down.

Colorado State University; Co-Founder, The Peace Corps.

Mr. Rappoport recasts human history in the light of two unidentified currents, **The Formula of the Secret Society**, and the **Tradition of Imagination**. He brilliantly shows how these are two sides of the same coin, and how individual creativity has been the real target of attack by controlling elites throughout the history of this planet.

2. Imagination Two — This course consists of **The Imagination Course** (three 90-minute audiocassettes), **The Infinite Imagination** (two 90-minute cassettes), and **The Paranormal Protocol** (one 90-minute cassette). 5. Imagination Five — This course consists of the initial programs in phase two of Mr. Rappoport’s revolutionary research. Here Mr. Rappoport has moved to another paradigm, another platform from which to look at what the imagination is, what it can do, and how it can thrive in our world. The programs are **Prologue to The Magic Universe** (one 60-minute audiocassette), **The Voyage of**

Merlin (three 90-minute cassettes), and **Pictures of Reality** (four 90-minute cassettes). You are introduced to the **Era of Magic**, which you may view as myth, as “interdimensional history,” as psychological archetype, or as artistic creation. Jon takes you on a fantastic journey which illustrates how eons pass into one another, how magic (creating with the imagination) is treated and used in a vastly different era, and what this means to us now.

Are We Alone? – Video

300,000 years ago spacefarers from Nibiru, the 10th planet of our solar system, colonized our Earth and by genetic engineering created Man in their image and likeness. They were the gods of the oldest people known to us, the Sumerians of Mesopotamia, who referred to them as the Anunnaki — “those who from Heaven to Earth came.” Eminent scientists of our time have since agreed that calculations tend to confirm the accuracy of the Sumerian creation tale.

ZACHARIA SITCHIN

Is modern science finally catching up with ancient knowledge?

Does this sound outlandish to you? Consider this.

Sitchin revealed in one of his earlier books, *The 12th Planet* (1976), exactly what the planets Neptune and Uranus would look like even before Voyager II reached them in the 1980s.

Where did he get this information?

Sitchin, being one of fewer than 200 scholars in the world who can translate cuneiform, says the Sumerians knew that these planets existed and what they looked like more than 5000 years ago. In addition, their early clay tablets revealed the existence of Neptune, Uranus, Pluto, and the existence of water and small life forms on Mars.

“An alien presence seems to be lingering around the Martian landscape,” says Sitchin, based on the strange disappearance of the Russian space probe, Phobos II, in early 1989. The mysterious shadow of a UFO-shaped object appeared in one frame taken by Phobos II, and the last picture transmitted revealed a large missile-shaped object heading directly towards it.

Zecharia Sitchin has written eight books on human origins and the possible visitations from an advanced culture. His books have sold millions around the world and are published in 13 languages.

The Cosmic Code: Ancient Secrets, New Meanings

How do the numbers of the gods reveal clues that decipher the secret meanings in divine names?

What do we now know about the Sumerian understanding of sophisticated genetic knowledge that was passed on to us?

How could Enoch really write down prophecies of future events, including the secrets of Creation and the cycles of events on Earth, as explained in the *Book of Jubilees* — and how could the Biblical prophets foretell the future?

Who were the master builders who constructed the platform of the Holy Temple, the Landing Place in Baalbek and the platform on which the Great Pyramid of Giza still stands?

“Sitchin is a zealous investigator.”
— Kirkus Reviews

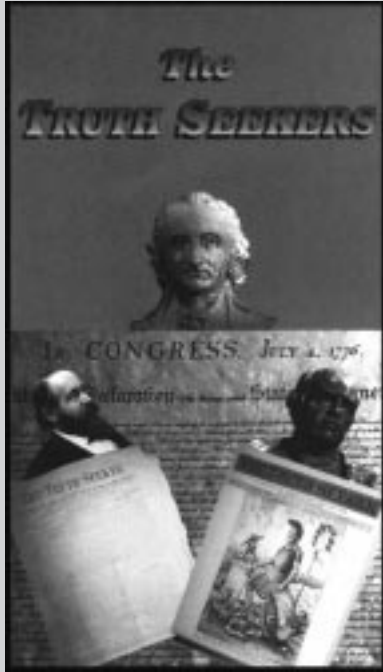

THE COSMIC CODE Between Fate and Destiny Lives Man

Many thousands of years ago, a race of extraordinary beings guided the evolution of life on Earth — determining the existence and nature of mankind as we know it today. All powerful, all knowing, the proof of their genius is apparent in the mysterious monoliths at Stonehenge, and in a strange but highly significant structure of concentric stone circles in Israel’s Golan Heights — both requiring sophisticated astronomical knowledge. Teaching man to look to the heavens, they bequeathed to us the Cosmic Code.

The newest entry in a carefully researched multivolume series tracing the creation and motivation of mankind, this book identifies the turning point in our species’ delicate balance between the demands of destiny and the vagaries of fate. From deep inside ancient Sumerian texts that predate even the Bible, Zecharia Sitchin dares to reveal the nature of prophecy and historical truths that have long been obscured by disbelief and misunderstanding: the code used to construct our kind by masters builders from the stars.

Dr. Turi is convinced that much of his awareness of his unique psychic talents, and his ability to access them, date from those encounters. His unarguable, well-documented predictions have been experienced by millions on the Internet, major publications, radio and televised programs all over the world. In 1993 he obtained a Ph.D. in Metaphysics from the Universal Light Institute in Sacramento, California.

***The Power of the Dragon* — Revised Edition**

Chinese Astrologers refer to the Moon's Nodes as the Dragon's Head and Tail and give tremendous attention to the placement in the natal chart. To my knowledge, the Dragon in itself holds as much, if not more, facts and power than the entire complexity of a whole Astrological chart! I found the essence of the Dragon's secrets to be a major contribution for success or failure in one's life. The South Node of the Moon is a negative energy that is a form of "karmic residue," dragging the soul toward his past accomplishments, inner fears and weaknesses. This build-up of previous incarnations must be eliminated, and a chance is given to you to experience something other than fear and dogmatic views. Sometimes, for specific karmic reasons, the Dragon's Tail can be used positively, thus having produced gifted musicians such as Bach and Schubert, born with the Dragon's Tail in Libra. The location of the Dragon's Tail is where all of your weaknesses will be coming from. You have been there. You have done that. You have learned those lessons.

Here is a philosophy which shows that the base and common ground for what we do is the same for all of nature. The computer is thought to be unique in its binary (0 and 1) applications. Everything You Know Is Wrong

Lloyd Pye

Pye gives a solid, defensible, entirely new position in the debate about life and human origins. That position is bolstered by an astonishing array of scientific facts unmentioned or ignored by the current two camps. By utilizing such a fact-based format, this book's rational presentation offers a far more convincing explanation for the origins of human life, than Darwinism or Creationism ever have . . .

Flight From Inflation: The Monetary Alternative

E C. Riegel

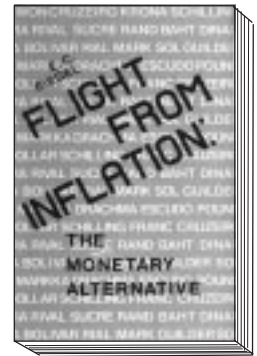

Riegel's major work, published for the first time, containing the definitive exposition of his monetary ideas. Supplemented with five essays and selections from the author's correspondence.

Concise and prophetic, this book exceeds by far the conventional limits of the discussion of money. With respect to inflation, it points out that there have been many inflations of individual national monetary units, but that in the past there always remained a relatively stable unit — the dollar in this century and the pound in the last — to which holders of vanishing units could take flight. This became the unit of account, enabling businesses to survive the extinction of their national unit.

What we are now experiencing, however, for the first time in history, is a global inflation with all of the national monetary units sliding into the sea. Riegel explains clearly the origins of the present world inflation and how a non-political monetary unit and system might be constructed before the world business community suffers a collapse. He offers specific guidelines for such a unit and system, which would evolve competitively and not await political sanction or require political measures. Edited by Spencer H. MacCallun and George Morton. Cloth cover with sewn binding, charts and diagrams, fold-out, index.

The Money Masters: How International Bankers Gained Control of America

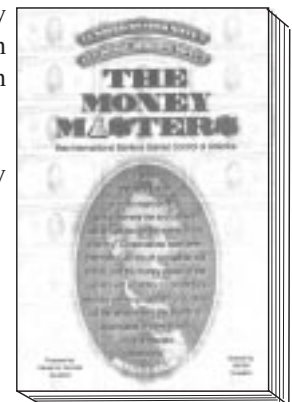

Patrick S.J. Carmack & Bill Still (Video Script in Book Format)

"If the American people ever allow private banks to control the issue of their currency, first by inflation, then by deflation, the banks . . . will deprive the people of all property until their children wake-up homeless on the continent their fathers conquered . . . The issuing power should be taken from the banks and restored to the people, to whom it properly belongs." — Thomas Jefferson

"The Government should create, issue, and circulate all the currency and credits needed to satisfy the spending power of the Government and the buying power of consumers. By the adoption of these principles, the taxpayers will be saved immense sums of interest. Money will cease to be master and become the servant of humanity." — Abraham Lincoln

IMAGINATION SETS Continued From Page 8

6. Imagination Six — This course consists of **Magic and Healing** (six 90-minute audiocassettes). Mr. Rappoport draws on his own extensive experience in working with healer Richard Jenkins, and in working on his own in energy healing for 35 years. He shows how aspects of healing directly relate to the imagination, particularly creation in the moment—improvisation. This is a one-of-a-kind account of how magic and healing intertwine with an improvisation which eludes any system or attempt to codify method. It liberates the attitude and mind from the conviction that all successful outcomes in this universe must be based on systems. It opens the door to an extremely exhilarating view of Reality which is fluid and gains its power from being invented in the moment.

7. Imagination Seven — This course consists of **Techniques for the Imagination** (one 90-minute audiocassette), **The Mass Projection of Events** (one 90-minute cassette), and **The Magic Excursions** (three 90-minute cassettes). Mr. Rappoport continues to offer the student specific exercises and techniques which he can use to increase the power and scope of his own imagination. That increase can then be applied to any area of human endeavor: simply being more effective and efficient, more focused, more lucid; being more motivated; finding a thrilling project that calls on the infinite well of one's energies and capacities; inventing in the realms of technology and science; extending the power of art; bringing about new styles and forms of social and political living. And more. In **The Magic Excursions**, Mr. Rappoport offers a series of complete sessions with him in a new form. These are not individual exercises. Mr. Rappoport takes the student on journeys into landscapes where the imagination of the student is called on to create in several dimensions, and often at a pace faster than the conscious capability can achieve. Through successive listenings to these journeys, a new stage of imaginative power can be reached.

Order #P207 • \$64.00

8. Imagination Eight — This course consists of **Imagination and Ecstasy** (one 60-minute audiocassette and one 90-minute audiocassette), **Voyages of the Imagination**, Parts 1, 2, and 3 (three 60-minute cassettes), and **New Voyage of the Imagination** (one 90-minute cassette). Mr. Rappoport explores in a way never presented before the power of using color in exercises of the imagination. He takes students on a series of new voyages into landscapes that provoke the imagination into going further and wider, into making more spaces and dimensions, into finding greater energies with which to work. These voyages of imagination (what Mr. Rappoport had been calling Excursions) are not creative visualizations or guided imagery or meditations. They are a new form of engagement for the consciousness.

The Cholesterol Hoax: 101 + Lies

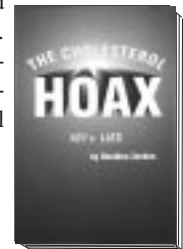

Sheldon Zerden

Did you know that Americans have spent over a trillion dollars on a hoax? Sheldon Zerden, with the help of many doctors, has compiled over 100 lies that are presented to people. If you have been diagnosed as having high blood cholesterol, you must read this book. The people with the highest cholesterol counts live the longest! Dr. George V. Mann calls cholesterol the biggest scam of this century. The scientific community, after 40 years and 27 clinical trials, has failed to show that lowering cholesterol with diet or drugs increases longevity. Sheldon Zerden is a stock market analyst and researcher. He has spent years in research and has enlisted the help of Nobel Laureate Dr. Linus Pauling, Dr. Robert Atkins, and a virtual hall-of-fame of nutrition experts to produce this book, which factually disproves the myths surrounding cholesterol and heart disease.

Holes in Heaven? 51-minute video

A Documentary — H.A.A.R.P. and Advances in Tesla Technology, Narrated by Martin Sheen

Are we making *Holes in Heaven?* HAARP (High Frequency Active Aural Research Program) is a controversial high frequency radio transmitter, or “ionospheric heater,” which is believed to be descended from the works of Nikola Tesla and is operated by; the U.S. Navy/Air force and Phillips Laboratories in remote Gakona, Alaska. Using HAARP, our military plans to focus a billion-watt pulsed radio beam into our upper atmosphere, ostensibly for ionospheric research. This procedure will form extremely low frequency waves and send them back to the Earth, enhancing communications with submarines and allowing us to “see” into the Earth, detecting anything from oil reserves to underground missile silos. However, several researchers claim HAARP poses many dangers, including blowing thirty-mile holes in Earth’s upper atmosphere. They also warn of possible disruption of the subtle magnetic energies of our Earth and ourselves. *Holes in Heaven?* is a prime example of grass-roots film making by producer Paula Randol-Smith and emmy-winning director Wendy Robbins. Narrated by Martin sheen, the film investigates HAARP, its history and implications, and examines the differing theories of independent scientists who inform us of the dangers and benefits of high and low frequencies and of electromagnetic technology. Among the many scientists interviewed are Dr. Bernard Eastlund, whose original patents are the reputed blueprints for HAARP, Project director Dr. John Heckscher; and Dr. Nick Begich and Jeane Manning authors of *Angels Don't Play This HAARP*.

Holes in Heaven? strives to give a fair and accurate appraisal of HAARP, and brings before the public, vital information about a project which could have a dramatic effect upon our entire world.

God Games: What do you do forever?

Neil Freer with introduction by Zecharia Sitchin

This book outlines the human evolutionary scenario far into the future. We are a genetically-engineered race with a dual racial heritage. Our half-Terran, half-alien genes place us on an accelerated, unique evolutionary path, already eagerly emerging from racial adolescence. Freer describes what's in store for us as this dawning genetic enlightenment reveals the new human and the racial maturity of a new planetary civilization on the horizon. We all can contribute to our racial future as we evolve from a slave species to far beyond what we could previously even imagine. The godspell broken, we new humans will create our own realities and play our own "god games."

Kundalini, Empowering Human Evolution

Selected Writings of Gopi Krishna

Edited by Gene Kieffer

"In all my writings, I have sown the seeds of what I consider to be the most pressing need of mankind — information about the evolutionary mechanism in human beings, slowly drawing the race to a golden future of harmony. . . ." — G. Krishna

Gopi Krishna reveals the remarkable source of psychic energy that lies within us all. Known only to the ancients by such names as the "sixth sense" and the "philosopher's stone:" this extraordinary life-force can be tapped to provide an inexhaustible reserve of energy and knowledge. *Kundalini, Empowering Human Evolution*, is the definitive guide to understanding the mystery of Kundalini and awakening this source of inner light, expanded consciousness and increased creativity in our own lives. In these powerful essays, Krishna shows how we can use Kundalini to guide our private and public lives, as well as to answer the urgent questions of our troubled age.

Gene Kieffer is director and president of the Kundalini Research Foundation. He is a member of the Academy of Religion and Psychical Research, and serves on the advisory board of the *Encyclopaedia of Evolution*.

The Message of the Sphinx

Robert Bauval

New and powerful astronomical, textual, and documentary evidence indicates that the orientation of the Sphinx and the pyramids of the Giza Plateau reflect the celestial configurations of approximately 12,000 years ago with surprising accuracy, challenging the validity of prevailing historical models.

Symbolist Egypt: The Meaning Behind the Magic Sacred Sites and Sacred Science of Ancient Egypt

— John Anthony West

The symbolist reinterpretation of ancient Egypt, first proposed by R.A. Schwaller de Lubiez, reveals the existence and methodology of an ancient sacred science based on cosmic principles. From Atlantis to the Sphinx

Colin Wilson

“The purpose of the hunting rituals of Cro-Magnon man was magical, and evidence of modern anthropology suggests that they *worked*. They worked because ancient man knew a secret we have forgotten — how to make use of the collective unconscious.”

Atlantis & The Earth's Shifting Crust

Rand & Rose Flem-Ath

Two decades of research into the fate of Atlantis draw upon and extend Charles Hapgood's theory of catastrophic earth crust displacement. Through the examination of ancient maps and a reinterpretation of Plato's enigmatic account, new evidence emerges that supports Hapgood's model and suggests that as the result of such an event, the mysterious lost continent may lie beneath the ice of Antarctica.

The Age of the Sphinx: A Geological Inquiry

— Robert M. Schoch

Crouching in the massive horseshoe shaped trench, the bruised and battered face of the Great Sphinx reveals secrets of the remote past. Geological and geophysical evidence re-dates the age of the Sphinx and its adjacent temples, suggesting that this monumental artistic masterpiece is many thousands of years older than previously believed.

The Archaeology of Consciousness

Paul Devereux

We need new cognitive maps for an expanded worldview. Where will this fresh cartography come from? There is persuasive evidence that ancient states of mind left their signatures on the landscapes and archaeological remains of the past. Comprehending their messages will require an understanding of consciousness and its relationship to its environment.

A Guided Mathematical Tour through Prehistory and Unexplained Phenomena

Jay Kappraff — The ancients had a more metaphysical approach to the art of measurement, yet were able to produce works of amazing mathematical precision. Unexpected mathematical relationships exist between ancient calendrical systems, geometrical designs underlying Greek and Roman structures, megalithic stone circles, and the shapes of plants, buds, and eggs.

Native American Precontact Maps: Ways of Being, Ways of Coming & Going

Lee Davis — Long before 1492, people in North America were proficient at representing their concepts about the cultural geography of space. Their maps went beyond mere description of the topographical landscape to provide information about identity and responsibility, about wholeness and healing, about location and movement between humans and other human beings in the larger cosmos.

A Celestial Interpretation of the Hall of Bulls from the Cave of Lascaux

Frank Edge — Prominent patterns of dots associated with the Great Bull images in the Cave of Lascaux can be shown to correspond to star clusters in the constellation of Taurus at the time of summer solstice in 15,000 B.C. It would require the artists to crawl for hours in darkness, through passageways barely wide enough for a human body, and sometimes to hang from a cliff on a rope, in order to produce these paintings.
